

Technical Rule no. 05 PAR

(pursuant to Article 4 of the Regulation of the Platform for the Allocation of Regasification Capacity, approved by Autorità di Regolazione per Energia Rete e Ambiente with Resolution 111/2018/R/gas)

Title	Technical specifications of the products tradable in the PAR segments
Reference Legislation	Article 22, paragraphs 22.2 and 22.4, of the Regulation

Published on 2 March 2018

1. Foreword

Article 22, paragraph 22.2, of the Regulation provides that for products concerning annual and multi-annual capacity slots without indication of the date of output, before the beginning of each session, GME shall notify the participants, according to the procedures and within the terms indicated in the Technical Rules, about the technical specifications of the tradable product.

Article 22, paragraph 22.4 of the Regulation provides that for products concerning capacity slots during the thermal year without indication of the date of output or with indication of the exact date of output, before the beginning of each session, GME informs participants about the technical specifications of the tradable product, according to the procedures and within the terms indicated in the Technical Rules.

2. Technical specifications of annual and multi-annual products

The technical specifications of the annual and multi-annual products are made available by GME, on the OLT segment, within the order book of the product being traded, within the opening hours of the session for the submission of offers. In particular, GME makes the following information available:

- a) number of slots to be allocated;
- b) reserve price (P);
- c) reserve price (R);
- d) high price steps and low price steps for each reserve price;
- e) relevant period.

3. Technical specifications of the products available during the thermal year

The technical specifications of the products available during the thermal year are provided by GME, in the relevant segment of the PAR, within the order book of the product being traded, no later than the opening hours of the session for the submission of offers, provided that the corresponding regasification company has notified to GME all the information of their respective

competence provided for in Article 26 of the Regulation. In the case of allocation of capacity issued, the corresponding slots are made available by GME, on the reference PAR segment, within the order book of the related product being traded, only after the participant (who has issued the capacity) has notified GME about the reserve price pursuant to the Technical Rule no. 08 PAR.

In particular, GME makes the following information available:

- a) number of slots to be allocated;
- b) relevant period;
- c) indication of the unloading date (if any);
- d) the calendar of the unloading dates at the terminal, where applicable.
