

## **Technical Rule no. 03 rev.04 PAR**

(pursuant to Article 4 of the Regulation of the Platform for the Allocation of Regasification Capacity, approved by Autorità di Regolazione per Energia Rete e Ambiente with Resolution 111/2018/R/gas)

<b>Title</b>	<b>Units of measurement</b>
Reference Legislation	Article 5, paragraph 5.1, of the Regulation

**Published on 16 July 2019**

## 1. Foreword

Article 5.1 of the Regulation provides that for the purposes of the Regulation, GME shall adopt the units of measurement indicated in the Technical Rules.

## 2. Units of measurement

In the PAR:

- a) the unit of measurement of the tradable as part of the procedures for the allocation of capacity during the thermal year, the allocation of residual capacity in thermal year<sup>(1)</sup>, the capacity no longer available in auction amount and within the procedures for the allocation of annual and multi-annual capacity is the slot:
- b) the unit of measurement of the currency is the Euro, specified with two decimal places;
- c) the unit of measurement for unit prices of the regasification capacity and ancillary costs is Euro/m3liq, specified with 6 (six) decimal places.

---

<sup>1</sup> The residual capacity in thermal year consists, pursuant to art. 2, paragraph 2.2, letter f), of the Regulations:

- of a unloading slot, for each month, starting from the month following the auction and until the end of the thermal year, or
- of any unloading slots still available for allocation, each referred to individual months of the thermal year, even if not consecutive to each other.

Ex: the regasification company wishes to provide 3 unloading slots for each month until the end of the thermal year (in the example, the residual product in thermal year consists of 8 months). If the participants indicates an amount equal to 1 slot, this implies a purchase offer of 8 slots (namely 1 slot \* for each of the 8 months), namely equal to 1 residual product in thermal year. If a participant indicates an amount equal to 2 slots, this implies a purchase offer of 16 slots (namely 2 slots \* each of the 8 months), namely equal to 2 residual products in thermal year.
